

# Cisco Virtual Visitation Service

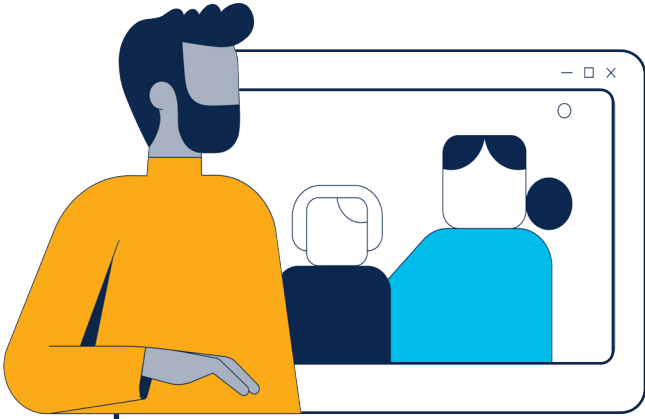

Did you know that we can help you design, implement, and deploy a secure, rules-based visitation system for the delivery of virtual inmate services?

## Delivering a secure and easy-to-use virtual visitation experience is now essential

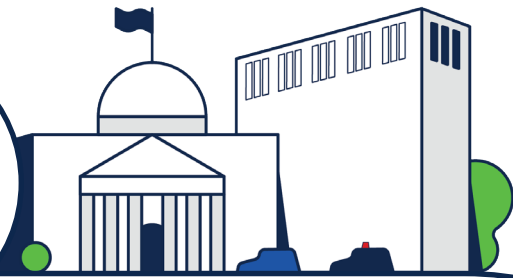

With the Cisco® Virtual Visitation Service (VVS), you enable increased access to legal aid, courts, probation, reentry, education, and other support services for incarcerated persons. And it's all within a secure and proven platform that integrates with your existing infrastructure. Plus, with Cisco VVS, you also add value through:

Transport costs savings | Reduced escorts | Improved healthcare delivery

### Unique features include:

- Fully automated workflows for each role-based user.
- Robust administrative controls.
- Integration with Jail Management Systems.

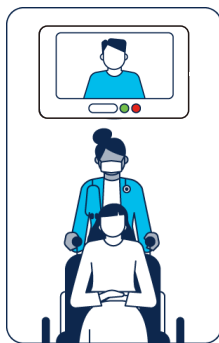

### Use cases

Court session

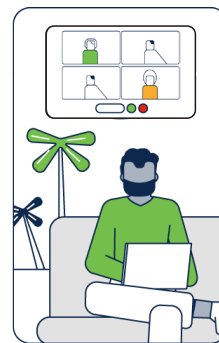

Attorney / client contact

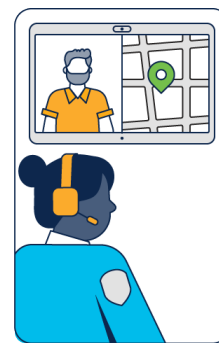

Telehealth and telepsychiatry

Educational content

Reentry groups and contracted services

Probation / parole

## Key features

Cisco VVS accelerates secure and easy-to-use services for incarcerated persons, while increasing accessibility and reducing your costs.

### Easy access:

- Portal availability for both external and internal users.
- Meetings easily scheduled through an intuitive interface.
- Users join via computer/smart device.

### Secure collaboration:

- Secure, cloud-based solution.
- Persona-based access control.
- Workflows and approvals defined based on business processes.

### Administrative control:

- Increased access to critical services.
- Streamlined management of meetings and devices.

## Cisco Virtual Visitation Service:

- Secure real-time video conferencing.
- Meeting scheduling portal.
- Scalable design that leverages existing network and services.
- Full solution delivery from Cisco CX team and/or our partners.
